PROFESSIONAL SUMMARY

GTM Engineer and AI automation specialist who builds the revenue infrastructure companies run on: signal-based outbound at scale, Clay data layers, and Claude agent systems wired into the client's own stack. Currently at RecruiterGTM, where I run outbound across client accounts (26,500+ touches at a 0.97% bounce rate), have shipped 20+ AI ops managers, and built Pulse Tracker, the client portal the delivery team runs on. Ten-plus ATS and CRM platforms integrated end to end. BS in Computer Science from FAST NUCES.

TECHNICAL ARSENAL

GTM & Outbound:	Clay (waterfalls, Claygent, ICP scoring, signal tables), Instantly, HeyReach, Lemlist, Apollo, Prospeo, Exa, deliverability & domain warm-up
AI & Agents:	Claude & Claude Agent SDK, MCP servers, Anthropic API, OpenAI, Gemini, RAG pipelines, agentic patterns (planning, reflection, tool use), Retell AI (voice)
ATS & CRM:	Recruiterflow, Bullhorn, Loxo, HubSpot, PCRecruiter, Crelate, Invenias, Gem, Stardex, Casepeer, Odoo, GoHighLevel
Product & Data:	Next.js, React, TypeScript, Node.js, Python, FastAPI, Supabase, PostgreSQL, MongoDB, Vercel, Docker
Automation & Ops:	n8n (self-hosted & cloud), Make, Zapier, Slack API, Notion API, Google Workspace, Xero, PDF.co, webhooks

EXPERIENCE

RecruiterGTM	Mar 2026 – Present
GTM Engineer & AI Automation Specialist	Remote
Outbound engine at scale: Build and run email and LinkedIn outbound across client accounts. 26,538 touches delivered from 61 campaigns, holding a 0.97% bounce rate (well under the 2% deliverability danger line), with 22% LinkedIn connection acceptance and replies on 32% of conversations opened. Clay data layer: Design the enrichment layer under every campaign, now live in 17 client stacks: provider waterfalls for verified emails, Claygent research columns, ICP scoring, cross-channel dedupe, and signal tables triggering on funding, hiring, and leadership changes. Claude AI ops managers: Shipped 20+ production agent workspaces for recruitment businesses, each wired into the client's own ATS with custom skills for sourcing, business development, content, and reporting. One deployed system directly enabled a recruiter to close a \$150K+ placement. Pulse Tracker (product): Built and shipped the client portal the delivery team runs on: campaign metrics synced daily, 90-day delivery roadmaps, a placements board, one-click content approvals, and an in-house booking engine that replaced Calendly. Next.js, TypeScript, Supabase, Vercel. Onboarding & ops automation: Cut client onboarding from a week of manual back-and-forth to a same-day automated flow (intake form to routed Slack channels, kickoff docs, secure API key handoff), and replaced hours of manual reporting with automated weekly recaps across a 70+ client operation.	
Trilles AI	Sep 2025 – Mar 2026
AI Automation Engineer — Team Lead	On Site
Legal intake automation: Built a full-cycle intake system capturing DMs across Instagram, TikTok, and Messenger via ManyChat, with AI-drafted replies, evidence collection, follow-up sequences, and structured cases pushed into Casepeer, running around the clock. Agentic data pipelines: Engineered an eBay scraping and enrichment system keeping a European used-battery marketplace in sync with 10 to 20 supplier stores, using Gemini with reflection and planning patterns to extract technical specs from unstructured listings. Cleared a week of manual listing work overnight. Mortgage LOS integration: Architected the document orchestration layer for Powerbanc Bionic LOS, routing and synchronising loan documents between borrowers, loan officers, and underwriters under strict compliance for a reverse mortgage firm.	

- **Pinterest intelligence platform:** Built a full-stack content generation and competitive analysis app that scrapes competitor pins, extracts insights with LLM analysis, and generates brand-aligned content with reach metrics.
- **Voice AI & team leadership:** Deployed Retell voice agents handling appointment booking 24/7 for a Dutch client, and led delivery across both client portfolios.

XcorreOct 2025 – Mar 2026

AI Automation EngineerRemote

- **Multi-channel lead architecture:** Engineered a centralised lead intake system for a Canadian beverage brand, unifying Facebook Lead Ads, WordPress, and cold outreach with standardisation and dedupe logic. Took lead response from hours to minutes with zero leads dropped in triage.
- **Conversational AI & property tech:** Deployed chatbots qualifying leads 24/7 on Instagram Messenger, and automated inspection booking through the Reapit API for UK property management teams.
- **Outbound & analytics:** Integrated Instantly with custom dashboards, and automated GoHighLevel and Calendly workflows for appointment management.

EynvisionDec 2025 – Feb 2026

Contract AI EngineerRemote

- **Replaced an outsourced bookkeeping firm:** Designed the invoice pipeline for a conglomerate running four entities across North America, South America, Europe, and Asia, handling roughly 20 invoices a day from a shared inbox with automated routing by corporate identity.
- **Intelligent extraction & Xero sync:** Parsed complex invoices with custom GL coding and tax treatment per entity, syncing to Xero with misroutes near zero and manual entry eliminated for the finance team.

ChrioJun 2025 – Sep 2025

AI/ML InternRemote

- **LLM-powered hiring engine:** Built a candidate recommendation system analysing resumes, LinkedIn profiles, and GitHub repos to generate ranked shortlists against job requisitions, cutting manual screening overhead.
- **Multi-model benchmarking:** Evaluated GPT-4, Gemini, and Claude on accuracy, latency, and cost, pairing NLP profile parsing with structured scoring for production deployment.

TTCJul 2025 – Sep 2025

Associate Automation EngineerRemote

- **Lead generation & SLA routing:** Built outreach systems using PhantomBuster and n8n with smart routing that distributed leads by SLA, sending hot leads to Calendly and warm leads to nurture while holding safe action limits.
- **Content scaling:** Developed automated article generation pipelines using GenAI for text and images, growing organic SEO footprint.

AlgorizmsJul 2025 – Sep 2025

Database Design InternRemote

- **Fleet management data architecture:** Engineered the database architecture for the Ukaab Fleet Management System on PostgreSQL/Supabase, defining relational schemas, constraints, and indexing strategies, with schema versioning and role-based access control for multi-tenant security.

EDUCATION

National University of Computing and Emerging Sciences (FAST NUCES)Graduated 2026

BS Computer Science — CGPA 3.44, Dean's ListIslamabad

- **Final year project — Zimedardrive:** Edge AI traffic violation detection on Android. Optimised YOLOv11/v12 on GPU delegates for low-latency detection, an evidence pipeline packaging footage, GPS, and on-device OCR into structured reports, and an analytics layer surfacing violation hotspots for city planners.

LEADERSHIP & CERTIFICATIONS

- **Vice Head, Team Parho & Parhao** — GDG on Campus, FAST Islamabad (Oct 2024 – May 2025). Mentored 500+ students through structured workshops and peer-led tutorials.
- **IBM (Coursera):** Python for Data Science, AI & Development · Getting Started with Git and GitHub · Introduction to Cloud Computing
